

HB 6592

To the Committee:

Homeopathy is a critical part of health care. It is a profession in itself with guidelines and standards of excellence. Other states have demonstrated that homeopathy can be licensed and practiced without a medical degree. Homeopathy is a critical component of a comprehensive health system and all CT residents would benefit if it were a distinct profession with exemplary standards of practice. Please vote in favor of its being a separate profession, such as social worker and psychology.

Sincerely yours,

Susan Kintner MSW, PhD
